DETAILED ACTION

1. Claims 1 and 4-23 are pending in this office action.

Response to Arguments

2. Applicant's appeal brief, filed July 24, 2006, has been fully considered and is persuasive. The rejection of claims 1 and 4-23 has been withdrawn.

Allowable Subject Matter

3. Claims 1 and 4-23 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an ad hoc network comprising trust groups, where a joining node joins the trust group by having a trusted node in the trust group attest for the joining node. The trusted node in the trust group attesting for the joining node is the one responsible for delegating the public key of the joining node to all nodes in the trust group. The delegation of public keys is performed without a certificate authority. This differs from traditional PGP in that the trust relationship is expanded without a secret meeting to swap keys or a central authority handing-out keys to newly joined members. Another missing feature is transitivity, that is, A trusts B, and B trusts C, therefore A trusts C. PGP does not provided for transitivity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
